Profile Summary

Full Stack Software Engineer and University of Moratuwa BIT graduate with nearly 4 years of industry experience. Specialized in the MERN stack, Laravel, and Nest.js with a deep focus on clean architecture and high-performance backend systems. Proven track record of optimizing complex databases, containerizing environments, and leading sprint cycles to deliver production-ready software.

Core Competencies

- | | | | |
|---------------|----------------|----------------|-----------------------|
| • Laravel | • React.js | • Git | • System Architecture |
| • Nest.js | • Vue.js | • Docker | • Advance Debugging |
| • Express.js | • Electron.js | • CI/CD | • Restful APIs |
| • Spring Boot | • Tailwind CSS | • DigitalOcean | • Agile/Scrum |
| • Node.js | • MySQL | • Linux | • Jira |
| • PHP | • MongoDB | • AWS | • AI Integrations |

Work Experience

Software Engineer

Nov 2023 – Present

Cyber Concepts LK (Pvt) Ltd

- Architected and scaled high-traffic web applications using Laravel and React.js, optimizing database queries and frontend rendering to cut page load times by 35% and comfortably handle surging concurrent traffic.
- Co-architected RESTful APIs and integrated external third-party services within an Agile team, reducing API response latency by 20% through optimized data mapping and caching.
- Guided 3 junior developers through structured code reviews and clean architecture practices, accelerating their onboarding time and reducing post-release bugs by 20%.

Associate Software Engineer

Sanmark Solutions (Pvt) Ltd

Jun 2022 – Aug 2023

- Earned an accelerated promotion from Intern to Associate Software Engineer within 6 months after independently owning and shipping 3 major full-stack product features ahead of schedule.
- Implemented and containerized production-ready services using Laravel, Node.js, and Docker, establishing CI/CD pipelines that slashed deployment downtime to near zero.
- Researched, prototyped, and deployed a production-ready Nest.js API within a tight 2-week deadline, successfully expanding the team's backend capabilities without delaying the release cycle.
- Championed the team's transition to Agile/Scrum methodologies, refining sprint planning and backlog grooming to increase team velocity by 25% over three quarters.

Education

Bachelor of Information Technology

Aug 2024 – Jan 2026

University of Moratuwa, Colombo, Sri Lanka

Major: Web Development | Minor: Machine Learning

Higher National Diploma in Information Technology

May 2019 – Aug 2023

Sri Lanka Institute of Advanced Technological Education, Labuduwa, Sri Lanka

Major: Web Development | Minor: Data Structures and Algorithms

Diploma in Information Technology

May 2019 – Aug 2023

Esoft Metro Campus, Matara, Sri Lanka

(Pearson assured)

Projects

- **FITSMART | AI- POWERED WELLNESS PLATFORM (UNIVERSITY FINAL YEAR PROJECT)**
 - Achieved an A+ grade for this 10-credit capstone project at the University of Moratuwa.
 - Created a full-stack personalized wellness platform using React.js, Nest.js, and MySQL, integrating the Gemini AI API to dynamically generate custom nutrition and workout plans based on user metrics.
 - Launched role-based authentication framework supporting Member, Mentor, and Admin profiles, integrating Google Calendar booking; reduced manual scheduling errors by 180 incidents per semester.
 - Deployed and maintained the application architecture on DigitalOcean Droplets, ensuring smooth data processing and reliable up time for active users.

- **ATTENDANCE TRACKING SYSTEM**

- Developed a high-concurrency attendance system using Laravel and Vue.js to handle real-time background synchronization across multiple distributed hardware terminals.
- Optimized complex database queries and orchestrated data pipelines in MySQL and Python, reducing reporting generation time by 40% and ensuring near-zero data discrepancies.
- Utilized Docker to containerize the complete application infrastructure, eliminating local-versus-cloud configuration mismatches and accelerating environment setups.

- **ROAD & INFRASTRUCTURE MANAGEMENT SYSTEM**

- Produced a regional infrastructure planning and resource management platform for the Road Development Authority (RDA) using Laravel, React.js, and MySQL to centralize project lifecycle tracking.
- Integrated the Google Maps API to deliver interactive, real-time spatial visualizations of road networks, accelerating project evaluation workflows for field engineers.
- Designed algorithmic resource estimation and milestone-tracking modules that replaced legacy manual spreadsheets, cutting project calculation errors and saving administrative hours each week.

- **CROSS-PLATFORM JEWELLERY MANAGEMENT SYSTEM**

- Engineered the cross-platform desktop ERP application using Electron.js, React.js, and TypeScript, unifying inventory management, workshop workflows, and automated billing into a single desktop interface styled with Tailwind CSS.
- Ensured 100% offline reliability and data integrity by implementing a localized SQLite database synchronization architecture for uninterrupted storefront operations.
- Programmed granular sales reporting analytics and internal artisan tracking modules, replacing manual paper trails with centralized data insights for storefront management.
