ABOUT ME

Results-driven Full Stack Software Engineer and BIT Graduate from the University of Moratuwa with nearly 4 years of industry experience. Expert in architecting robust web applications and scalable enterprise APIs using MERN and Laravel. I am a proactive problem-solver dedicated to clean code, agile methodologies, and delivering high-performance technical solutions.

EDUCATION

2024 - 2026	UNIVERSITY OF MORATUWA BACHELOR OF INFORMATION TECHNOLOGY Completed the Bachelor of Information Technology degree with a 3.54 GPA, specializing in Software Engineering.
2019 - 2023	SRI LANKA INSTITUTE OF ADVANCED TECHNOLOGICAL EDUCATION (SLIATE) Completed Higher National Diploma in Information Technology (NVQ Level 6)
2018 - 2019	ESOFT METRO CAMPUS D-TEC Completed diploma in IT at Esoft Metro Campus Matara. (Pearson assured)
2009 - 2018	ST. THOMAS' COLLEGE, MATARA. Passed G.C.E. A/L (Maths) in 2018 and G.C.E. O/L in 2014.

WORK EXPERIENCE

Nov 2023 - Present	CYBER CONCEPTS LK (PVT) LTD SOFTWARE ENGINEER - Engineered large-scale web applications using Laravel and Vue.js, focusing on high-performance system architecture and scalable deployment. - Collaborated in an Agile team to architect robust RESTful APIs and integrate complex third-party services. - Mentored junior developers on coding best practices while consistently proposing innovative solutions for project optimization.
July 2022 - Aug 2023	SANMARK SOLUTIONS (PVT) LTD ASSOCIATE SOFTWARE ENGINEER - Promoted from Intern to Associate Software Engineer following the successful delivery of multiple full-stack project milestones. - Developed real-world applications using Laravel, Node.js, and Docker, ensuring adherence to industry-standard coding practices and clean architecture. - Rapidly Researched and implemented a production-ready NestJS API, demonstrating a high capacity for mastering new frameworks under tight deadlines. - Spearheaded the transition to Agile methodologies within the team to improve sprint velocity and cross-functional communication.

SKILLS

• Languages and Frameworks

- React | Vue | Tailwind
- Laravel | Nest | Express
- PHP | Node | Spring boot
- SQL | Mongo
- Electron

• Tools and Technologies

- GIT
- Jira
- Docker | Linux | Cloud
- Postman
- LLMs | Copilot

• Soft Skills

- Effective Communication
- Problem Solving
- Team Work
- Leadership

PROJECTS

• FITSMART | AI-POWERED WELLNESS PLATFORM (UNIVERSITY FINAL YEAR PROJECT)

- Achieved an A+ grade for this 10-credit capstone project at the University of Moratuwa.
- Developed a comprehensive full-stack platform providing AI-personalized nutrition and workout plans with real-time progress tracking.
- Implemented multi-role authentication (Member, Mentor, Admin) and a community mentorship booking system.
- Tech Stack: React | Nest | MySQL | Gemini AI API | Google Calendar API | Digital Ocean Droplet

• ATTENDANCE TRACKING SYSTEM

- high-concurrency enterprise system for real-time attendance monitoring.
- Focused on optimizing large-scale database queries and ensuring seamless data synchronization across distributed environments.
- Integrated automated reporting tools to provide management with data-driven operational insights.
- Laravel, Vue.js, Docker, MySQL, Python, Hikvision Fingerprint Terminal

• ROAD & INFRASTRUCTURE MANAGEMENT SYSTEM

- Developed for the Road Development Authority (RDA) to streamline regional infrastructure planning and resource management.
- Integrated Map APIs for interactive, real-time visualization of developed vs. underdeveloped road networks.
- Engineered advanced modules for water supply estimation and milestone-based project progress tracking.
- Tech Stack: React, Laravel, MySQL, Google Map API.

• CROSS-PLATFORM JEWELLERY MANAGEMENT SYSTEM

- Engineered a specialized ERP solution to manage complex inventory, workshop workflows, and automated billing.
- Implemented cross-platform desktop compatibility using ElectronJS and TypeScript, ensuring offline reliability and data integrity with SQLite.
- Optimized business operations by developing detailed sales reporting modules and artisan collaboration tools.
- Tech Stack: ElectronJS, React, TypeScript, Tailwind CSS, SQLite.
